## (Clear, Opaque) Inkjet Waterslide Decal Paper

(Clear, Opaque) Inkjet Waterslide Decal Paper that can be used by Deskjet printers, or Inkjet label printers, such as Epson L8058, SurePress Digital Label, Canon iX4000, HP Smart Tank 678, and vinyl cutters or die cutter with edge positioning combination, for all
your craft projects. Personalize and customize your project by printing unique designs on our decal paper.

Since Inkjet Waterslide Decal Paper is not waterproof, it needs to be sprayed with **varnish** for protection first after inkjet printing. Then Transfer decals onto ceramics, glass, jade, metal, plastic materials and other hard surfaces. It is specifically designed for the decoration of glass wax candles, glass vases, fashion ceramic cups, toy crafts and other plastic stationery etc.

Step by step: Deskjet Printers and Inkjet Labels for Printing on Crafts

Step 1. Print patterns by inkjet printers

Step 2 . Spraying clear varnish for waterproof

Step 3 .Cut patterns by vinyl cutting plotters.

Step 4.　Submerge you pre-cut decal in 45~55°C water for 30-60 seconds or until the middle of the decal paper can easily slide around.

Step 5. Quickly apply it to your clean decal surface then remove the carrier gently behind the decal, squeeze the images and remove the water and bubbles from the decal paper.

Step 6. Let the decal set and dry for at least 48 hours. Don't be exposed to direct sunlight during this time.

Step 7. Spraying clear varnish for better gloss, hardness, scrub resistance if needed

Note: If you want better gloss, hardness, washability, etc., you can use polyurethane varnish, acrylic varnish, or UV-curable varnish to spray coverage protection. It is preferred to spray clear **automotive varnish** to obtain better gloss, hardness, and scrub resistance.
