Canon

Xerox

Ricoh

Step by step: Multifunction Printers and Color Copiers for Printing on Crafts

Step 1. Print patterns by Digital printing presses, or Multifunction Printers and Color Copiers

Step 2 .Cut patterns by vinyl cutting plotters.

Step 3. Submerge you pre-cut decal in 30~55°C (Celsius) water for about 30~60 seconds or until the middle of the decal can easily slide around. Remove from water.

Step 4. Slide the printed side up onto the crafts, and gently scrape away the water droplets and air bubbles between the printed side and the crafts with a damp towel or soft rubber scraper

Step 5. Let the decal set and dry for at least 48 hours. Don't be exposed to direct sunlight during this time.

Step 6. Spraying car clearcoat for better gloss, hardness, scrub resistance

Note:

1). If you want better gloss, hardness, washability, etc., you can use polyurethane varnish, acrylic varnish, or UV-curable varnish to spray coverage protection. It is preferred to spray clear **automotive varnish** to obtain better gloss, hardness, and scrub resistance.

2. Towel is made of 88.3% polyester/11.7% nylon fiber blends, brushing

Finishing Recommendations

Material Handling & Storage: conditions of 35-65% Relative Humidity and at a temperature of 10-30°C. Storage of open packages: When an open packages of media is not being used remove the roll or sheets from the printer cover the roll or sheets with a plastic bag to protect it from contaminants, if you are storing it on end, use an end plug and tape down the edge to prevent damage to the edge of the roll do not lay sharp or heavy objects on unprotected rolls and do not stack them.
