

Stick and stitch embroidery design paper

Stick and stitch embroidery paper is a self-adhesive, water-soluble stabilizer that lets you easily transfer designs onto fabric for hand embroidery; you simply peel, stick, stitch through the fabric and paper, then rinse away the paper in warm water, leaving only your design. It's ideal for beginners and complex patterns, offering convenience by eliminating tracing and ensuring clean, residue-free results on items like shirts, hats, and tote bags.

Products

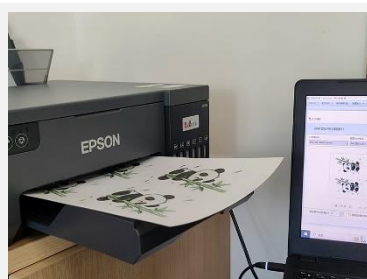

Stick & stitch

Code: P&S-40

Size: A4 (210mm X 297mm) - 100 sheets/bag, A3 (297mm X 420mm) - 100sheets/bag

Inks: dye ink, pigment ink

Printers: Canon、Epson、brother、HP inkjet printers

Advantages

Self-Adhesive: Sticks to fabric for easy placement, no tracing needed.

Water-Soluble: Dissolves completely in water, leaving no residue.

Versatile: Works for hand embroidery, punch needle, cross-stitch, and quilting.

Printable or Pre-Printed: Available with various designs or as blank sheets for your own patterns.

Fabric-Like Feel: Flexible and durable during stitching.

What can you do about your fabric designs ?

T-shirts

hats

tote bags

inkjet Printers

Canon MegaTank

HP Smart Tank

Epson L8058

Step by step: Make your design onto fabric with stick & stitch paper

Step 1. Choose a design:

Use pre-printed patterns or print your own onto the non-sticky side.

Step 2 . Apply:

Peel off the backing, stick the design onto your fabric (like a sticker), smooth out wrinkles, and place them in an embroidery hoop.

Step 3 . Embroider:

Stitch directly through the fabric and the stabilizer paper.

Step 4. Rinse:

After stitching, soak or rinse the fabric in warm water; the paper dissolves, revealing your finished embroidery.

Finishing Recommendations

Material Handling & Storage: conditions of 35-65% Relative Humidity and at a temperature of 10-30°C. Storage of open packages: When an open packages of media is not being used remove the roll or sheets from the printer cover the roll or sheets with a plastic bag to protect it from contaminants, if you are storing it on end, use an end plug and tape down the edge to prevent damage to the edge of the roll do not lay sharp or heavy objects on unprotected rolls and do not stack them.
