nail

skin

## Printer Recommendations (Normal printers and ink)

Canon MegaTank

HP Smart Tank 678

Epson L8058

Step by step: printing, water slide

Step 1. Inkjet printing (Normal paper, photo paper quality)

Step 2. Attach the adhesive sheet on the printed tattoo paper

Step 3. Cut out the images with scissors or cutting plotters.

Step 4. Peel back the film on the adhesive sheet and fold in a small corner. Stick down this exposed corner to the corner of your tattoo paper.

Step 5. Attach it on your skin, Use wet tissues or cotton to dab water onto the tattoo for about 10 seconds. The backing should slide off easily when ready.

Step 6. Remove the backing paper
